

APPLICATION FORM: GREASE SEPARATORS

Customer data

Name:.....

Address:

.....

.....

Phone number:.....

Mailadres:.....

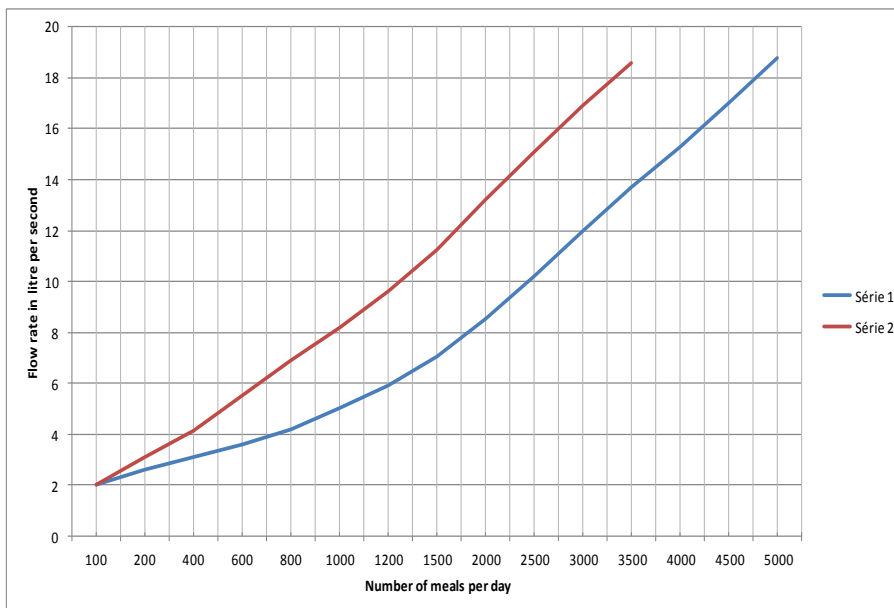

Following information should be provided:

- In case of restaurants, canteen, ...

In these cases, you can find the necessary flow rate in the graph below.

The temperature of the liquid is very important:

- A) Series 1: temperature less than 30°C
- B) Series 2: temperature between 30°C and 60°C

- In case of industrial applications:

For this, we have to make a calculation. To do this, we need the following information:

- A) The maximum flow rate
- B) The temperature of the water
- C) The amount of grease in the water
